

Dr P Kishore, Isle of Man

"Preparation for Flu Pandemic"

The WHO predicts that a flu pandemic is likely to occur in the next three years. The UK has produced detailed plans on dealing with the Flu pandemic.

As Islands, we face two types of problems:

Crown dependencies: The UK has not included the crown dependencies in their order for Oseltamivir (and possibly the H5N1 vaccine and PPE). Crown dependencies have to make their own plans and acquire their stock

ALL islands: Problems of Business Continuity

The presentation will cover in detail the approach used in Isle of Man to handle both issues.
